

**Prof. MD. Boubekour Saddik Fekraoui**

Dr L. Benbadis University Hospital, University of Constantine 3, Algeria

المستشفى الجامعي الدكتور بن باديس، جامعة قسنطينة 3، الجزائر

University professor-hospital practitioner. Since 2020, prof. Boubekour Saddik Fekraoui became Chief Physician of the Neurology Department at Benbadis University Hospital. He also holds the position of head of the neurological emergency unit and the neurovascular unit, as well as the position of head of the ENMG unit since 2018. The main areas of his research focus on neurovascular pathologies, inflammatory pathologies of the central nervous system, neurophysiological explorations of the peripheral and central nervous system. Physical activity is one of his interests in his research as a non-drug therapeutic means. As a result, he is responsible for a national research project on the treatment of patients with multiple sclerosis through adapted physical activity.
